DÉCOUVERTES

# THE WINE HAS ITS STYLE

## THEY ARE CALLED THE 9 WISE

Benevolent, they imprint their personality in their wines: frank, distinguished, delicate, elegant, generous, harmonious, rich, subtle, and lively. They have given themselves the mission of writing a new story in the world of Lavaux viticulture.

These characters carefully shape part of this illustrious vineyard using ancestral techniques, with patience and great respect for the land that welcomes them.

So, during a day punctuated by a tasting and a winegrower's meal in presence of one of the Wise, set off to discover all the aspects of their incredible adventure in a breathtaking landscape!

You will have the opportunity to speak to the master or mistress of the place, to know all his or her secrets and to let your taste buds awaken to new flavours.

Meet in Lavaux, where your certified guide will be waiting to take you for a stroll across the wine trails. Explore this astonishing vineyard, from the rows of vines to the depths of the cellars.

Choose your transport (round trip) from your hotel: train, boat or car.

Live an unforgettable experience!

- 1 lunch with 3 wines
- Presence of the winemaker

## NOT INCLUDED

- Transport / Transfers
- Travel insurance

2 PERSONS  
FROM CHF 1'550.-

## WINE HAS ITS OWN STYLE

### LIVE, FEEL AND SAVOUR! ORGANIC AND BIODYNAMIC WINES

The world of work in the vineyard is varied and is often oriented according to the people who carry it out. They all listen to the land and the vineyard, each with a solution that brings together their knowledge and their philosophy of life.

This theme focuses on emerging or well-established cultures moving towards maximum respect for the environment and collaboration with nature.

#### **Organic cultivation**

In Switzerland, the organic viticulture guarantees that no chemical treatment has been applied in the vineyard and that particular care has been taken to improve the biodiversity of the cultivated area.

#### **Biodynamic cultivation**

The biodynamic approach considers the interactions between all the elements of the universe and the cycles that punctuate it. It includes the biological approach, adds revitalisation of the soil through natural enrichment, and considers planetary and stellar rhythms.
